Local expertise. Global resources. A commitment to Hong Kong.

Learn more about Local expertise. Global resources. A commitment to Hong Kong. (/country/HK/EN/what-we-do)

We launched our business in Hong Kong over 90 years ago, and are today a premier provider of corporate and investment banking, asset management and private banking services. Local corporations and institutions, multinationals, governments and private clients rely on our global strength, local expertise and leadership across these lines of business.

We have operated in Asia Pacific since 1872, and today are present across 17 markets in the region. Local corporations and institutions, multinationals, governments and private clients rely on us for market-leading financial services — a confidence bred from our strength and ability to deliver integrated services across the Corporate & Investment Bank, Asset Management and the Private Bank.

In Asia Pacific, we are committed to helping promote economic growth and economic inclusion through our key philanthropic initiatives in the areas of workforce readiness, small business development and financial capability. Our investments aim to increase the number of quality jobs created for the underserved individuals and communities, helping small businesses become more sustainable, as well as assisting marginalized people in gaining access to affordable financial products so that they can become more financially secure. This shared commitment to the community drives our Foundation's giving and employee engagement and volunteering activities across the region.

J.P. Morgan is a global leader in financial services, offering solutions to the world's most important corporations, governments and institutions in more than 100 countries. As announced in early 2018, JPMorgan Chase will deploy \$1.75 billion in philanthropic capital around the world by 2023. We also lead volunteer service activities for employees in local communities by utilizing our many resources, including those that stem from access to capital, economies of scale, global reach and expertise.
